

**Name:** Vsevolod Ovsienko  
**Goe Strength** 6D

Vsevolod has been playing Go for almost ten years now. In 2014, when he was around six years old, he accidentally found a Go board and two bowls with black and white stones in his house (none of his family played Go at that time). This marked the start of his incredible journey!

First, he learned the Go rules and began participating in tournaments in a Go club for children in his native Kyiv. One and a half years later, he visited the European Youth Go Championship for the first time. That event impressed him a lot! Since that time he began to participate in different tournaments: mainly in Ukraine first, and in European and Asian ones in a while.

Nowadays Vsevolod is the multiple Youth Champion of Ukraine and the European Youth Champion in different age categories.

In 2023 he became a Champion of Ukraine.

On his way, Vsevolod is supported and taught by the best teachers in Europe:

Artem Kachanovskyi - the first European professional player from Ukraine who started teaching Vsevolod when he hadn't become a dan player and continues to this day;

Andrii Kravets - another strong European professional from Ukraine with whom Vsevolod learned a lot during the last two years;

Yang Su (Jeff Su) - the well-known among European top players talented Go teacher who have been sharing his knowledge and support with Vsevolod during the last year;

Antti Törmänen - the Japanese professional player from Finland originally with whom Vsevolod had the honor to study within the past year.
